

How BoxNgo can make your business more money!

Did you know if you occupy office space you may be paying as much as \$800 per square metre (psm) and around \$2,000 psm for specialty retail space, just to store excess office furniture, archive files, or store excess or last season's inventory? You may not be paying these rent levels yet, but office and retail rents have surged typically 60% in the past 12 months, so you will feel this bottom line impact come your next rent review!

Should your storage space measure a modest 4sqm then it could be costing you, as a retailer, around \$8,000 per year just to have that stuff sitting in your shop. On top of that there's the lost opportunity to make more sales when you consider that the space you've set aside for storage within your business premises could be replaced with displays to carry more stock, or occupied by an additional revenue generating employee!

All you need to do to tap this bottom line profit potential is to rent a BoxNgo Room and have BoxNgo store your stuff off-site. To rent a BoxNgo storage Room which measures about 4sqm, for 12 months, will be about 2.5 times less than the cost of archiving files in your office and 7 times less than the cost of storing inventory on-site at retail premises.

And it gets better. With BoxNgo's re-delivery service, you call and BoxNgo will return your storage Room to your business and then when you've finished extracting that file or unloading your stock, BoxNgo will return your storage Room to store.

BoxNgo - a convenient, simple and profitable business solution!
